Change The Way You Do Research.

PsycINFO, together with SilverPlatter® Information, Inc., has developed a complete information package for your department: PsycLIT on compact disc. It brings you material from the PsycINFO database, providing summaries of the world's literature in psychology and related fields from over 1300 journals, cumulated since 1974.

State-of-the-art and designed for ease of use, PsycLIT is a unique search system—a resource that allows students, faculty, clinicians, and others to research the psychological literature anytime—without leaving the office or incurring online connect charges.

PsycLIT uses the powerful new technology of CD-ROM (compact disc read only memory). These extremely durable compact discs have enormous storage capacity—the entire PsycLIT database has been mastered on two discs! All you need to use PsycLIT on compact disc is an IBM PC or Apple Macintosh, a CD-ROM drive, and a printer.

SilverPlatter® provides advanced search and retrieval software that makes it easy to find the exact information that you need, quickly, conveniently, and cost-effectively. PsycLIT is available for *unlimited*, interactive searches at a fixed annual fee of $3995 (discount available to *PA* subscribers). This fixed annual rate means the cost per search actually *decreases* with each additional search you do. All this makes PsycLIT an ideal tool for training student researchers—and the most important innovation in psychological research ever.

Unlimited access to the behavioral literature, at your fingertips in minutes—at a fixed cost, no matter how much you use it.

PsycLIT will change the way you do research.

This Annual Subject Index, published in four volumes, consolidates more than 140,000 references to approximately 42,000 abstract records published in 12 monthly issues of *Psychological Abstracts* from January 1989 through December 1989. A companion work, the Annual Author Index, references these records by author and document title.

Index terms, selected from the *Thesaurus of Psychological Index Terms*, represent the literature covered for the periods indicated. Only terms assigned as major terms, reflecting the main focus of the article, appear in the printed subject index. (Terms assigned as minor do not appear in print but are available for online searching.) Subject matter content determines the specific terms used and, thus, not every thesaurus term will appear in every index. "See" and "See Also" references are present to direct the user to the preferred terminology or related areas of interest. Index phrases are alphabetically arranged under the appropriate index terms and represent a concise statement of the article's content or, when appropriate, identify the independent and dependent variables described in the material as well as the subject population. Style changes such as the increased use of abbreviations or the elimination of some hyphens may result in some inconsistencies and may affect the alphabetical order of phrases.
